EXPERIENCE

Cognizant - Senior Associate Data Scientist (Promoted from Associate May 2025)

Aug. 2022 - Present

- Developing data science and engineering projects for the crop science division of a Fortune 500 client, delivering stakeholder-driven solutions across the full data science lifecycle — project scoping, data ingestion, ETL automation, data warehousing, MLOps, cloud infrastructure (AWS/GCP), version control, and visualization.
- Developer of Climate Change Impact and Adaptation tools; a customizable crop modeling framework, utilizing ETL pipelines, complex data science techniques, and MLOps, that simulates the crop growing cycle under different climate change scenarios anywhere globally. Informs business strategy, allowing client company to maintain revenue while mitigating climate change risks, and provides strategic actionable insights on crop yield shifts, optimal environmental conditions, agro-management practices, gas emissions, etc. and how climate change impacts these factors through 2100.
- Delivered the patentable Market Share Forecast tool employing data science techniques and MLOps for predictions, classification, and feature extraction — yielding unprecedented insights into market share shifts and their key drivers.

Hoffman Brothers Realty - Python Developer

Jan. 2022 - Dec. 2022

- Developed automated workflows in Python using AWS (Lambda, EventBridge, S3), including an application import tool that parses and migrates hundreds of applications weekly to Airtable, reducing labor costs by thousands monthly. Identified additional automation opportunities and maintained existing pipelines.
- Engineered Python scripts for CRUD ops and EDA on Airtable data to uncover market trends and enhance productivity.

Cherre - Data Engineer Intern

May 2021 - Aug. 2021

- Utilized GCP (Big Query, Data Studio, GCS) to build repeatable analysis, construct complex SQL queries, deduce data lineage, and gain an overall understanding of cloud technologies.

Affinity Healthcare Center - Data Entry

May 2019 - Jan. 2022

- Facilitated data entry into the company database, constructing various scripts to automate insertion processes.

Red Oak Enterprises - Leasing Consultant

Sep. 2019 - Jun. 2020

- Presented and leased over 50 units, increasing company traction and profit.

Danny's Tutoring - Tutor

Sep. 2018 - Jun. 2019

- Mentored several students in mathematics (through Calculus) and US history to successfully pass their courses.

SKILLS

- Programming/Technical Skills: Python, SQL, AWS, GCP, Git/Github
- Spoken Languages: English, Hebrew
- Certifications: AWS CCP, Microsoft: AZ-900, ML Specialization (U. of Wash.), Database Technician (US Dept. of Labor)

EDUCATION

California State University, Northridge (CSUN)

- Bachelor of Science - Computer Science, Minor in Statistics, May 2022

Los Angeles Valley College (LAVC)

- Associate of Science - Mathematics, June 2020

Bar Ilan University, Tel Aviv

- Gap Year Program, June 2018
